

ArcGIS Mississippi Technology Day

October 5, 2017

8:15 to 4:30pm

Expand the Use of GIS

Join us for a free, live seminar to learn new ways to be more effective with ArcGIS. Esri experts and local Esri business partners will share tips & tricks, demonstrate best practices for your ArcGIS apps, and help you discover what's new in ArcGIS. Whether you're a seasoned ArcGIS Desktop user, a manager of a GIS program, or a business analyst wanting to learn more about ArcGIS, this seminar is for you.

Esri staff and Esri Business Partners will demonstrate ArcGIS products and workflows using current user examples.

This seminar will help you:

- Establish a mapping platform for your entire organization
- Collaborate with other departments, agencies, and citizens to improve efficiency and transparency
- Use new functionality in the ArcGIS system to share geographic knowledge
- Educate others in your organization on how to create and use maps
- Expand your capabilities as a GIS professional to better serve your organization
