Summary

This dataset represents aircraft landing facilities in the United States and U.S. Territories. A brief summary of the item is not available

Description

The Airports database is a geographic point database of aircraft landing facilities in the United States and U.S. Territories. Attribute data is provided on the physical and operational characteristics of the landing facility, current usage including enplanements and aircraft operations, congestion levels and usage categories. This geospatial data is derived from the FAA's National Airspace System Resource Aeronautical Data Product

*** NOTE April 2017, MARIS extracted the MS portion of this data set for distribution ***
