Title: Local Emergency Operations Centers

Edition: 2009 Q4

Geospatial Data Presentation Form: vector digital data

Online Linkage: [HSIP GOLD 2015](#)

Description:

Abstract: HSIP Local Emergency Operations Centers in the United States "The physical location at which the coordination of information and resources to support domestic incident management activities normally takes place. An Emergency Operations Center may be a temporary facility or may be located in a more central or permanently established facility, perhaps at a higher level of organization within a jurisdiction. Emergency Operations Centers may be organized by major functional disciplines (e.g., fire, law enforcement, and medical services), by jurisdiction (e.g., Federal, State, regional, county, city, tribal), or some combination thereof." (Excerpted from the National Incident Management System) The GFI source for this layer contains State and Federal Emergency Operations Centers in addition to local Emergency Operations Centers. This dataset contains these features as well. In cases where an Emergency Operations Center has a mobile unit, TechniGraphics captured the location of the mobile unit as a separate record. This record represents where the mobile unit is stored. If this location could not be verified, a point was placed in the approximate center of the Emergency Operations Centers service area. Effort was made by TechniGraphics to verify whether or not each Emergency Operations Center has a generator on-site and whether or not the Emergency Operations Center is located in a basement. This information is indicated by the values in the [GENERATOR] and [BASEMENT] fields respectively. In cases where more than one record existed for a geographical area (e.g., county, city), TechniGraphics verified whether or not one of the records represented an alternate location. This was indicated by appending "-ALTERNATE" to the value in the [NAME] field. Some Emergency Operations Centers are located at private residences. The [TYPE] field was manually evaluated during the delivery process to compare the records in which the [NAME] field contained "-ALTERNATE". In cases where these values contradicted information that was verified by TechniGraphics (e.g. [NAME] contained "-ALTERNATE" and [TYPE] = "PRIMARY"), the value in the [TYPE] field was changed to match the type indicated by the [NAME] of the verified record.

TechniGraphics did not change values in this field if the type was not verified. Records with "-DOD" appended to the end of the [NAME] value are located on a military base, as defined by the Defense Installation Spatial Data Infrastructure (DISDI) military installations and military range boundaries. "#" and "*" characters were automatically removed from standard HSIP fields that TechniGraphics populated. Double spaces were replaced by single spaces in these same fields. At the request of NGA, text fields in this dataset have been set to all upper case to facilitate consistent database engine search results. At the request of NGA, all diacritics (e.g., the German umlaut or the Spanish tilde) have been replaced with their closest equivalent English character to facilitate use with database systems that may not support diacritics. The currentness of this dataset is indicated by the [CONTDAT] field. Based upon this attribute, the oldest record dates from 08/28/2009 and the newest record dates from 11/18/2009.

Purpose: Homeland Security Use Cases: Use cases describe how the data may be used and help to define and clarify requirements. 1. A resource for preparing, mitigating, responding to and recovering from an emergency. 2. A list of resources to draw upon by surrounding areas when local resources have temporarily been overwhelmed by a disaster. 3. A resource for Emergency Management planning purposes. 4. A resource for catastrophe response to aid in the retrieval of equipment by outside responders in order to deal with the disaster. 5. A resource for situational awareness planning and response for Federal Government events.

Supplemental Information: If you are using this dataset as a shapefile, please be aware that it was converted from a Geodatabase. As a result, this shapefile may have attribution and metadata errors resulting from the conversion process. The following are known issues: null values may have been changed to 0s (zeros) or to blank values, numbers (including latitude and longitude) may have been rounded up or down, there may be issues with Unicode character strings, and time cannot be stored in a date field. Field names may have been truncated to no longer than 10 characters or completely changed, lengthy string attributes may have been truncated to 254 characters, and attribute columns may have been deleted. Shapefiles do not support coded domains and subtypes therefore the original file geodatabase attribution and metadata information for coded domains and subtypes could be incorrect or missing in the shapefile version. Please visit the following ESRI website for more information: <http://pro.arcgis.com/en/pro-app/tool-reference/appendices/geoprocessing-considerations-for-Shapefile-output.htm>

Entity and Attribute Information:

Detailed Description:

Entity Type:

Entity Type Label: Local_EOC

Entity Type Definition: The physical location at which the coordination of information and resources to support domestic incident management activities normally takes place. An Emergency Operations Center may be a temporary facility or may be located in a more central or permanently established facility, perhaps at a higher level of organization within a jurisdiction. Emergency Operations Centers may be organized by major functional disciplines (e.g., fire, law enforcement, and medical services), by jurisdiction (e.g., Federal, State, regional, county, city, tribal), or some combination thereof.

Entity Type Definition Source: National Incident Management System

Attribute:

Attribute Label: PHONELOC

Attribute Definition: Indicates whether the phone number in the [TELEPHONE] field rings to the actual location of the entity.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: NO

Enumerated Domain Value Definition: Phone number does not ring to the actual entity location. It may ring to an administrative office or central location.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: <BLANK>

Enumerated Domain Value Definition: Unknown - It is not known if the entity's phone number rings to the entity's location.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: YES

Enumerated Domain Value Definition: Phone number rings to the actual entity location.

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: ID

Attribute Definition: Unique identifier for feature.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: FIPS

Attribute Definition: Five (5) digit FIPS (Federal Information Processing Standards) Code for the County where entity is located. The first two (2) digits represent the state and the last three (3) digits identify the county within the state.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Codeset Domain:

Codeset Name: Federal Information Processing Standards Publications - Counties and Equivalent Entities of the U.S., Its Possessions, and Associated Areas.

Codeset Source: National Institute of Standards and Technology (NIST)

<<http://www.itl.nist.gov/fipspubs/co-codes/states.txt>>

Attribute:

Attribute Label: CITY

Attribute Definition: The name of the city associated with the entity's physical address. For physical addresses that the U.S. Postal Service (USPS) delivers to, this should be a "city" acceptable to the USPS as defined in their Address Information System (AIS). Sometimes the USPS does not deliver mail to a physical address but recognizes the location (i.e., they list the location as "undeliverable"). The cities associated with these locations are acceptable. In some cases, the USPS does not recognize individual physical addresses in a city; rather, they list the city as having "General Delivery". In these cases, the city and associated zip code are acceptable (the entity's [ADDRESS] field will contain a street address, not "general delivery").

The entity may not actually be located within the city limits of the "city" specified in its [CITY] field. Instead, it may actually be located within the city limits of another city. In some cases, the "city" that appears in this field may not even be a city in an administrative sense, but it is still an acceptable "city" to the USPS. An example of this is "Notre Dame, IN". There is no city in Indiana called "Notre Dame", but this is considered an acceptable city by the USPS for any delivery going to the University of Notre Dame which is actually located in the city of South Bend. "Notre Dame", like most USPS cities, is an easily recognized place, and it gives the user of the data a good general idea of where the entity is located (if the entity is located in a small municipality, the USPS "city" may be more recognizable than the name of the municipality), and it would be part of the address one would use to send a shipment to the entity's location. Using the USPS acceptable "city" also allows someone to do a logical consistency check between the zip code and the city by using the USPS AIS. Sometimes an entity may report a city that is not accepted by the USPS, and although TechniGraphics has tried to replace those cities with an acceptable alternative, some of them may remain in this dataset.

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: COUNTY

Attribute Definition: County name where entity is located.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Codeset Domain:

Codeset Name: Geographic Names Information System (GNIS)

Codeset Source: US Department of the Interior - US Geologic Survey

Attribute:

Attribute Label: EMERGTITLE

Attribute Definition: Title of person or name of office for emergency point of contact.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: GEOHOW

Attribute Definition: Method by which entity was geocoded.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: MANUAL

Enumerated Domain Value Definition: Entity was manually geocoded.

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: NAICSCODE

Attribute Definition: NAICS (North American Industry Classification System) Code for entity. NAICS Codes (and NAICS Descriptions) have been assigned based upon the entity's primary function, regardless of if that is the function that qualified it to be included in this dataset. On the other hand, HSIP Themes are assigned based upon the function that qualified an entity for inclusion in this dataset. It is possible that if an entity appears in more than one dataset, then it will have a different HSIP Theme in each dataset, but it should have the same NAICS Code and NAICS Description in each case.

Attribute Definition Source: TechniGraphics

Attribute:

Attribute Label: CONTHOW

Attribute Definition: Method by which entity was contacted.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: PHONE

Enumerated Domain Value Definition: Entity was contacted by phone.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: ALT REF

Enumerated Domain Value Definition: Geospatial reference information obtained from local authorities, e.g., downloadable parcel maps, 911 streets, and shape files.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: MAIL

Enumerated Domain Value Definition: Entity was contacted by mail.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: EMAIL

Enumerated Domain Value Definition: Entity was contacted by email.

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: GEOLINKID

Attribute Definition: Link ID for the street segment to which the entity was geocoded. Refer to the [ST_VENDOR] and [ST_VERSION] fields for the street vendor and version that was used to geocode the entity.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: ADDRESS

Attribute Definition: Physical street address for entity. "PO Box", "General Delivery", "Rural Route", and "Highway Contract" addresses are not considered physical addresses and should not appear in this field. Some areas do not have regular city style addressing, so entities in those areas may not have a street number. In such cases, the name of the road on which they are located is listed in this field. Some rural areas may not have named roads. In these rare cases, this field will be blank.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: PERMANENT_

Attribute Definition: Indicates if the EOC is a permanent/fixed facility. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: Colorado Department of Local Affairs (CODLA)

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: YES

Enumerated Domain Value Definition: The EOC is a permanent/fixed facility.

Enumerated Domain Value Definition Source: Colorado Department of Local Affairs (CODLA)

Enumerated Domain:

Enumerated Domain Value: <BLANK>

Enumerated Domain Value Definition: Unknown or not provided.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: NO

Enumerated Domain Value Definition: The EOC is not a permanent/fixed facility.

Enumerated Domain Value Definition Source: Colorado Department of Local Affairs (CODLA)

Attribute:

Attribute Label: REGION

Attribute Definition: Indicates the geographic region in which the Emergency Operations Center is located. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: 7

Enumerated Domain Value Definition: Entity is located in the region covered by the Caddo/Bossier Office of Homeland Security Emergency Preparedness.

Enumerated Domain Value Definition Source: Louisiana Geographic Information Center (LAGIC)

Enumerated Domain:

Enumerated Domain Value: 4

Enumerated Domain Value Definition: Entity is located in the region covered by the Iberia Office of Homeland Security Emergency Preparedness.

Enumerated Domain:

Enumerated Domain Value: 6

Enumerated Domain Value Definition: Entity is located in the region covered by the Rapides Office of Homeland Security Emergency Preparedness.

Enumerated Domain Value Definition Source: Louisiana Geographic Information Center (LAGIC)

Enumerated Domain:

Enumerated Domain Value: 2

Enumerated Domain Value Definition: Entity is located in the region covered by the Baton Rouge Office of Homeland Security Emergency Preparedness.

Enumerated Domain Value Definition Source: Louisiana Geographic Information Center (LAGIC)

Enumerated Domain:

Enumerated Domain Value: 5

Enumerated Domain Value Definition: Entity is located in the region covered by the Calcasieu Office of Homeland Security Emergency Preparedness.

Enumerated Domain Value Definition Source: Louisiana Geographic Information Center (LAGIC)

Enumerated Domain:

Enumerated Domain Value: M

Enumerated Domain Value Definition: Unknown.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: SE

Enumerated Domain Value Definition: Entity is located in the Southeast region of the state.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: 3

Enumerated Domain Value Definition: Entity is located in the region covered by the Assumption Office of Homeland Security Emergency Preparedness.

Enumerated Domain Value Definition Source: Louisiana Geographic Information Center (LAGIC)

Enumerated Domain:

Enumerated Domain Value: 8

Enumerated Domain Value Definition: Entity is located in the region covered by the Ouachita Office of Homeland Security Emergency Preparedness.

Enumerated Domain Value Definition Source: Louisiana Geographic Information Center (LAGIC)

Enumerated Domain:

Enumerated Domain Value: 9

Enumerated Domain Value Definition: Entity is located in the region covered by the Washington Office of Homeland Security Emergency Preparedness.

Enumerated Domain Value Definition Source: Louisiana Geographic Information Center (LAGIC)

Enumerated Domain:

Enumerated Domain Value: NW

Enumerated Domain Value Definition: Entity is located in the Northwest region of the state.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: SW

Enumerated Domain Value Definition: Entity is located in the Southwest region of the state.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: WC

Enumerated Domain Value Definition: Unknown.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: NE

Enumerated Domain Value Definition: Entity is located in the Northeast region of the state.

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: TYPE

Attribute Definition: Indicates type of facility. The values for this attribute were provided by individual states, however, in cases where these values contradicted information that was verified by TechniGraphics (e.g. [NAME] contained "-ALTERNATE" and [TYPE] = "PRIMARY"), the value in this field was changed to match the TechniGraphics verified record. TechniGraphics did not change values in this field if the type was not verified.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: <BLANK>

Enumerated Domain Value Definition: Unknown or not provided.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: ALTERNATE

Enumerated Domain Value Definition: Indicates entity is the alternate facility for the Emergency Operations Center.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: PRIMARY

Enumerated Domain Value Definition: Indicates entity is the primary facility for the Emergency Operations Center.

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: CONT2PHONE

Attribute Definition: Phone number of the secondary contact person associated with the Emergency Operations Center. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Phone numbers formatted as nnn-xxx-nxxx. Only numeric digits are used.

Attribute:

Attribute Label: OTHER2

Attribute Definition: Phone numbers formatted as nnn-xxx-nxxx. Only numeric digits are used. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Phone numbers formatted as nnn-xxx-nxxx. Only numeric digits are used.

Attribute:

Attribute Label: ZIP

Attribute Definition: Five (5) digit USPS zip code for entity's physical location.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Codeset Domain:

Codeset Name: USPS Address Information System - Domain is further restricted by only allowing physical (non PO Box) zip codes.

Codeset Source: United States Postal Service

Attribute:

Attribute Label: HAS_FOOD

Attribute Definition: Indicates whether or not the Emergency Operations Center has food on hand for staff members in an emergency. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: <BLANK>

Enumerated Domain Value Definition: Unknown - It is not known whether or not the entity has food on hand for staff members.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: Y

Enumerated Domain Value Definition: Entity has food on hand for staff members.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: N

Enumerated Domain Value Definition: Entity does not have food on hand for staff members.

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: RULEID

Attribute Definition: Unknown

Attribute Definition Source: Unknown

Attribute Domain Values:

Unrepresentable Domain: Number

Attribute:

Attribute Label: GEOPREC

Attribute Definition: Geocoding precision.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: ONENTITY

Enumerated Domain Value Definition: Entity is geocoded on entity rooftop per aerial imagery (in most cases USGS DOQQs).

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: APPROXIMATE

Enumerated Domain Value Definition: Entity is geocoded to correct block and correct side of street per street data indicated by [ST_VENDOR] and [ST_VERSION].

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: EMERGTEL

Attribute Definition: Ten (10) digit telephone number of emergency point of contact formatted as nnn-xxx-xxxx. All alphabetic characters have been translated to the corresponding numeric digit.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Phone numbers, including area code, formatted as nnn-
nnn-nnnn. A list of valid area code and exchange combinations can be found at
<http://www.nanpa.com>

Attribute:

Attribute Label: CONT1PHONE

Attribute Definition: Phone number of the primary contact person associated with
the Emergency Operations Center. The values for this attribute were provided by
individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Phone numbers formatted as nnn-
nnn-nnnn. Only
numeric digits are used.

Attribute:

Attribute Label: TELEPHONE

Attribute Definition: Ten (10) digit telephone number for entity formatted as nnn-
nnn-nnnn.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Phone numbers formatted as nnn-
nnn-nnnn. Only
numeric digits are used. The area code and exchange must form a valid combination.
A list of valid area code and exchange combinations can be obtained from
<<http://www.nanpa.com>>.

Attribute:

Attribute Label: GEODATE

Attribute Definition: Date entity was geocoded by TechniGraphics.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Date

Attribute:

Attribute Label: DIRECTIONS

Attribute Definition: A description of the entity's location or status.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: SHAPE

Attribute Definition: Feature geometry.

Attribute Definition Source: ESRI

Attribute Domain Values:

Unrepresentable Domain: Coordinates defining the features.

Attribute:

Attribute Label: Y

Attribute Definition: Latitude in WGS 84 Decimal Degrees.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Range Domain:

Range Domain Minimum: -90

Range Domain Maximum: 90

Attribute Units of Measure: WGS 84 Decimal Degrees

Attribute:

Attribute Label: STATE

Attribute Definition: Two (2) character abbreviation for state associated with the entity's physical address. In almost all cases, this is the same as the state where the entity has been depicted geospatially. However, there are cases, particularly where an entity is part of a larger facility that cuts across state lines, where the entity's location may be depicted in a state other than the one indicated in this field. Also, the state in which an entity appears to be located may change depending on the scale of the state boundary theme being used.

Enumerated Domain:

Enumerated Domain Value: LOCAL - LARGE

Enumerated Domain Value Definition: Unknown. Values in this field provided by Virginia Geographic Information Network.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: COUNTY

Enumerated Domain Value Definition: Entity offers county wide coverage.

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: LVLGOVOP

Attribute Definition: The level of government agency operating at the Emergency Operations Center in the event of an emergency. This field was populated by evaluating values in the [NAME] field.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: FEDERAL

Enumerated Domain Value Definition: A federal agency operates the Emergency Operations Center in the event of an emergency.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: COUNTY

Enumerated Domain Value Definition: A county-level agency operates the Emergency Operations Center in the event of an emergency.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: LOCAL

Enumerated Domain Value Definition: A local agency operates the Emergency Operations Center in the event of an emergency.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: STATE

Enumerated Domain Value Definition: A state-level agency operates the Emergency Operations Center in the event of an emergency.

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: FAX

Attribute Definition: Ten (10) digit fax number for entity formatted as nnn-xxx-nnnn. All alphabetic characters have been translated to the corresponding numeric digit. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Fax numbers, including area code, formatted as nnn-xxx-nnnn. Only numeric digits are used.

Attribute:

Attribute Label: CONT2EXT

Attribute Definition: Extension of phone number for the secondary contact person associated with the Emergency Operations Center. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Text. Only numeric digits are used.

Attribute:

Attribute Label: CONT1EMAIL

Attribute Definition: Email address of the primary contact person associated with the Emergency Operations Center. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: CONT1EXT

Attribute Definition: Extension of phone number for the primary contact person associated with the Emergency Operations Center. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Text. Only numeric digits are used.

Attribute:

Attribute Label: CONT1FAX

Attribute Definition: Fax number of the primary contact person associated with the Emergency Operations Center. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Fax numbers formatted as nnn-xxx-nxxx. Only numeric digits are used.

Attribute:

Attribute Label: EMAIL

Attribute Definition: Primary email address for agency. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Text

Attribute:

Attribute Label: POCPHONE

Attribute Definition: Phone number for the point of contact person associated with the Emergency Operations Center. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Phone numbers formatted as nnn-xxx-nxxx. Only numeric digits are used.

Attribute:

Attribute Label: PAGER_EXT

Attribute Definition: Extension of the pager number for the contact person associated with the Emergency Operations Center. The values for this attribute were

provided by the West Virginia Department of Military Affairs/Department of Homeland Security and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Phone numbers formatted as nnn-xxx-nxxx. Only numeric digits are used.

Attribute:

Attribute Label: CELL2

Attribute Definition: Cell phone number of the secondary contact person associated with the Emergency Operations Center. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Phone numbers formatted as nnn-xxx-nxxx. Only numeric digits are used.

Attribute:

Attribute Label: PAGER

Attribute Definition: Pager number of the contact person associated with the Emergency Operations Center. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Domain Values:

Unrepresentable Domain: Phone numbers formatted as nnn-xxx-xxxx. Only numeric digits are used.

Attribute:

Attribute Label: CLASS

Attribute Definition: Indicates the classification of the entity. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: EFEO

Enumerated Domain Value Definition: Entity is classified under "Emergency Response - Emergency Operation Centers"

Enumerated Domain Value Definition Source: FEMA Hazus User's Manual

Enumerated Domain:

Enumerated Domain Value: <BLANK>

Enumerated Domain Value Definition: Unknown or not provided.

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: DISPATCH

Attribute Definition: Dispatch number associated with the Emergency Operations Center. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Unrepresentable Domain: Phone numbers formatted as nnn-xxx-xxxx. Only numeric digits are used.

Attribute:

Attribute Label: NAICSDESCR

Attribute Definition: NAICS (North American Industry Classification System) Description for entity. At the request of NGA, the "Index Entries" that appear on the NAICS webpage (<http://www.census.gov/epcd/www/naics.html>) are being used to populate this field, as opposed to the "NAICS Title". While there is a one to one correspondence between NAICS Codes and "NAICS Titles", there is a one to many relationship between NAICS Codes and the "Index Entries". By using the "Index Entries", we have placed the entities that make up this layer into more specific categories; however, the user of this data should be aware that this was not the intended purpose of these "Index Entries". The "Index Entries" were intended as a way to search the NAICS database and as a means of enumerating establishment types under the given NAICS Code. Thus, there are often two or more "Index Entries" that are synonyms, for example: "Prisons" and "Penitentiaries". In cases like this, we have standardized on one "Index Entry". NAICS Descriptions (and NAICS Codes) have been assigned based upon the entity's primary function, regardless of if that is the function that qualified it to be included in this dataset. On the other hand, HSIP Themes are assigned based upon the function that qualified an entity for inclusion in this dataset. It is possible that if an entity appears in more than one dataset, then it will have a different HSIP Theme in each dataset, but it should have the same NAICS Code and NAICS Description in each case.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: EMERGENCY PLANNING AND MANAGEMENT OFFICES, GOVERNMENT

Enumerated Domain Value Definition: [NAICS Code: 922190]: Government establishments primarily engaged in public order and safety (except courts, police protection, legal counsel and prosecution, correctional institutions, parole offices, probation offices, pardon boards, and fire protection). These establishments include the general administration of public order and safety programs. Government

establishments responsible for the collection of statistics on public safety are included in this industry.

Enumerated Domain Value Definition Source: TechniGraphics

Attribute:

Attribute Label: MED_SUPP

Attribute Definition: Indicates whether or not the Emergency Operations Center stockpiles medical supplies for the staff's benefit during an emergency. The values for this attribute were provided by individual states and TechniGraphics did not verify these values.

Attribute Definition Source: TechniGraphics

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: Y

Enumerated Domain Value Definition: Entity has medical supplies for the staff's benefit.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: N

Enumerated Domain Value Definition: Entity does not have medical supplies for the staff's benefit.

Enumerated Domain Value Definition Source: TechniGraphics

Enumerated Domain:

Enumerated Domain Value: <BLANK>

Enumerated Domain Value Definition: Unknown - It is not known whether or not the entity has medical supplies for the staff's benefit.
