

Urisa-Alabama (which is now GIS Association of Alabama) is planning a FOSS4G mini conference in Madison at the city hall on August 14th. Registration begins at 8:30 and presentations start at 9am. FOSS4G is an acronym for Free and Open Source Software for Geospatial. This event is an opportunity for GIS users in the area to get together and discuss projects, software, and get to know one another. If you aren't familiar with open source GIS software, it's an opportunity to learn about tools that can augment your Esri stack.

We will also have free food!

The event is free. We have a registration page set up

here... <https://www.eventbrite.com/e/foss4g-huntsville-2018-an-open-source-gis-event-tickets-47856090856>. Pre-registering will help us figure out how much food we need. However, we will also have on-site registration.

The agenda is still unfolding as we add presentations. You can keep track on our

Wiki... <https://wiki.osgeo.org/wiki/20180814-Huntsville-foss4g>

If you'd like to present or have any questions, email me or give me a call. There are 20 minute and 50 minute spots for presentations.

Hope to see you there!

Michael
