

## **Status of 2018 NAIP**

The USDA 60 cm 2018 NAIP photography has been finally completed. They are now in the process of QA/QC.

The 2018 Compressed County Mosaics (CCMs) have been posted on the USDA Geospatial Data Gateway, but these have **NOT** been inspected and should not be downloaded or used.

MARIS has placed an order for both the completed CCMs as well as the 4-band geo-tiffs. According to USDA-APFO staff, it will be **several months** before this data is ready for distribution.

We will post an announcement at that time.
